AUDIT WORKING PAPERS

0300.00

INTRODUCTION

0301.00

SCOPE OF CHAPTER

0301.05

It is impractical to make rigid rules covering the arrangement and content of all working papers. Each audit or examination has problems peculiar to it alone, and each auditor has their own ideas as to what constitutes essential information and how it should be presented. Inflexibility in procedures and working papers tends to discourage initiative, whereas the aim of the Board is to encourage this type of quality in tax auditors. There are, however, certain features of working papers that can and should be standardized, such as size and type of paper, indexing, cross-referencing, binding and general arrangement of data. This chapter addresses those features, together with complete specimen sets of working papers and representative samples of various types of summary and subsidiary schedules.

AUDIT WORKING PAPERS DEFINED AND DESCRIBED

0301.10

The term “audit working papers”, as used in this chapter, means the worksheets compiled by the auditor in the course of making a field audit, revised audit, reaudit, field billing order, or adjusted field billing order, together with other pertinent material. “Other pertinent material” may include letters, faxes, memoranda compiled by the taxpayer, photocopies of letters, reproduced copies of pertinent schedules, information from prior audit working papers, etc.

GENERAL GUIDELINES FOR WORKING PAPERS

0301.15

Working papers serve as the connecting link between the auditor’s fieldwork and the audit report. As such, working papers should contain the evidence accumulated in support of the conclusions and recommendations included in the audit report.

General guidelines for the preparation of working papers include:

- a) **Completeness and accuracy** — Working papers should be complete and accurate in order to provide proper support for findings, conclusions, and recommendations. Working papers also document the nature and scope of the examination performed. The test of completeness is whether a third party can review the schedule, understand its purpose, and make use of it, without consulting with the auditor who prepared it. Working papers will be examined by the auditor’s supervisor, and by the reviewing auditors, and may be used by hearing officers, attorneys, Board members, or as evidence in courts of law. They are the basis for recommended determinations and usually serve as a measure of an auditor’s experience and judgment.
- b) **Clarity and understandability** — Working papers should be clear and understandable without supplementary oral explanations. The information they reveal should be clear, complete, and concise. Anyone using the working papers should be able to readily determine their purpose, the nature and scope of the work done, and the auditor’s conclusions. Conciseness is important, but clarity and completeness should not be sacrificed just to save time or paper.

GENERAL GUIDELINES FOR WORKING PAPERS

(CONT.) 0301.15

- c) **Legibility and neatness** — Working papers should be legible and as neat as practicable. Sloppy working papers may lose their worth as evidence. Crowding and writing between lines should be avoided by anticipating space needs and arranging the working papers before writing. Some simple guides to follow in this respect are:
- Use careful handwriting.
 - Use of captions to separate subjects.
 - Confine the length of comments on fifteen-column worksheets to approximately six columns.
 - Separate subject matter properly.
 - Use computer generated working papers to ensure that working papers are legible and neat. (See Section 0302.07 and 0302.08.)
- d) **Pertinence** — The information contained in working papers should be restricted to matters that are material, pertinent, and useful with reference to the audit assignment. The auditor should not copy figures from the taxpayer's books without good reason, but should consider the audit procedure and method of verification so that only necessary data will be recorded.

WORKING PAPER TECHNIQUES**0302.00****HANDWRITTEN WORKING PAPERS****0302.05**

Although infrequent, hand written schedules prepared by the auditor will be written on paper furnished by the Board. Only one side of the paper will be used.

Schedules will be prepared by using a black, medium-hard grade, approximately No. 2 ½ pencil. The use of red pencil is permitted for special purposes such as cross and source referencing. Blue pencil will be restricted to the use of the Centralized Review Section.

COMPUTER GENERATED WORKING PAPERS**0302.07**

Computer generated schedules can be prepared by using 8" x 11, 8 ½" x 14, 14" x 11" or 11" x 17" paper. If available, 11" x 17" paper may be used instead of using 8 ½" x 14" paper which is inserted sideways in the audit. Only one side of the paper will be used. Schedules on 8 ½" x 11" paper may be printed in "landscape" format.

Audit working papers that are prepared by computer must conform to the working paper standards set forth in this chapter. These schedules must include the same information, comments, and referencing required for audit working papers in general.

There are four main areas that should be included on all computer-generated schedules and templates. They include:

- 1) Schedule number, page number, account number, auditor name and date in the upper right hand corner.
- 2) Column references: "A" thru- "H" at the top of each regular template (if more space is needed may be less than "H"), "A" – "P" for the exempt sales template, and "A" — "S" for the paid bills template. Additional columns may be added as necessary.
- 3) Line numbers down the left-hand side of the schedule body.
- 4) A general referencing line (above the column headings) and a general reference column (left hand column).

STANDARDIZED AUDIT SCHEDULES**0302.08**

The following standards should be followed when audit schedules are prepared either in Excel or Access and should be followed, where appropriate, when audit schedules are hand written.

- 1) **Font.** The font used will be either **Arial, Times Roman, or Courier New**. The entire audit should be prepared using the same font. Minimum font size is 10.
- 2) **Scaling.** Print Scaling can be done for subsidiary and lead schedules. **Print Scaling will not be less than 70% (68% for Exempt Sales Test)** of the original size of the document.
- 3) **Schedule Orientation.** Lead schedules should be printed in portrait form whenever possible. Subsidiary schedules can be prepared in either portrait or landscape form. When subsidiary schedules are prepared in landscape form, the schedule heading will be oriented to the right in the audit report. The schedule (on legal-size paper) will be hole punched in the lower left corner to ensure the proper orientation.

- 4) Database Schedules.** Database schedules (i.e. schedules detailing tests of sales and purchases) can be printed with grid lines. Database schedules must be printed with bottom borderlines. All schedules must contain line numbers. Line numbers should not start with "1" on each successive page of the same schedule. In this manner, every line number will identify each scheduled item on which page it is located (e.g., page 1 numbered 1 thru 30, page 2 numbered 31 thru 60, page 3 numbered 61 thru 90, etc.).
- 5) Paper Size.** Lead schedules will be prepared on Letter Size (8 ½" x 11") or Tabloid Size paper (11" x 17"). Legal Size (8 ½" x 14") paper is acceptable for lead schedules if they are computer generated schedules (since field printers use this size paper). Subsidiary schedules can be printed on the paper sizes mentioned in previous section (e.g., letter size, tabloid size, legal size, etc.)
- 6) Schedule Titles.** All schedules should have titles that accurately describe the contents of the audit working paper.
- 7) Top Right Corner.** All schedules will have a schedule number, page number, account number, auditor name and date in the upper right hand corner. Hand written schedules using 15-column paper should have the same information mentioned above in the upper right hand corner of the left half of each sheet.
- 8) Page Totals.** Page totals are always required for all schedules. Page totals will either appear at the bottom of each page or, in the case of computer generated schedules, may be placed on a separate page via a pivot table. (A pivot table is a special kind of table that summarizes information from particular fields of a list or database.) A grand total is always required for all schedules. Grand totals should match the summary by page total and the summary by quarter (or period) total.
- 9) Schedule Footer.** Schedules generated via Excel should include a footer indicating and appearing as follows:

"Copy to Taxpayer"

"Date: _____"

Schedules will be prepared with the following information, when applicable. Pertinent information for "Test of Claimed Exempt Sales" and "Purchases Subject to Use Tax" is listed below and illustrated in Exhibits 2 and 5.

Column	Test of Claimed Exempt Sales	Column	Purchases Subject to Use Tax
A	Invoice Date	A	Invoice Date
B	Invoice Number (and/or Ref Number)	B	Invoice Number (Ref Number)
C	Customer Name	C	Vendor
D	Street	D	Street
E	City, State, Zip	E	City, State, Zip
F	Ship to	F	Ship from point (State designator)
G	PO Number	G	Ship to
H	PO Status	H	PO Number
I	Item (& quantity)	I	PO Status
J	Amount Questioned	J	Resale Cert. Issued (Y/N)
K	Amount Taxable	K	Item (quantity)
L	District Measure	L	Amount Questioned
M	District Code	M	Amount Taxable
N	Comments (e.g., Resale Card on File)	N	District Measure
O	XYZ Sent	O	District Code
P	1164 Sent	P	Comments — Account posted to (include chart of accounts if only account number is used)
		Q	ABC Sent
		R	1032 Sent
		S	1164 Sent

If additional information is required, specific columns and appropriate headings can be added to the appropriate part of the schedule. This may cause the schedule to exceed the allowable print space available on legal size paper and would therefore necessitate that these schedules be printed on tabloid size paper (11 inches by 17 inches). Also note that additional linking fields can be added to the database, however, they do not need to be printed, unless the information is pertinent to the audit.

SCHEDULE FOR EACH SUBJECT

0302.10

Every subdivision of the audit working papers is assigned an index number, which is used in arranging the schedules when the audit is completed. *Each schedule supporting a different category of sales or deductions, or self-consumed merchandise, will be written up on a separate sheet. Unrelated data should not be put together on one schedule.* This is true even though only a few lines may be required to record the desired information. The cost of preparing separate schedules is insignificant when compared with time wasted in looking for data buried in a schedule relating to some other subject. The only exception of combining data is when Form BOE-414-C, Report of Examination of Records, is used as a working paper schedule for two or more items verified as having been correctly reported although a deficiency or credit is recommended as to other items covered by an audit. Use of 8 ½" x 11" computer paper or seven-column paper for verification comments in lieu of a BOE-414-C is permissible only in those instances where there is insufficient space on the form.

DATA FURNISHED BY TAXPAYER**0302.15**

Taxpayers should be encouraged to furnish data, which may be on their own paper or on disk. The taxpayer-provided schedule should be identified as "prepared by taxpayer." *Such data should have proper headings inserted, be indexed, cross-referenced, and filed with the regular working papers.* Unless unusual circumstances warrant, taxpayer-furnished material should not be manually copied but should either be incorporated directly into the audit working papers or photocopied.

If paper on which such data is placed is larger than our 17" x 11" worksheets, it will be folded. If considerably smaller, it will be affixed on an 8 ½" x 11" worksheet.

CREDIT ITEMS**0302.20**

Credit items, or items which are opposite in sign to other entries on a schedule, will be written with a minus (—) sign in front of the number. For hand written schedules, a minus sign (—) in black pencil in front of the number will be used. The common method of writing such items in red must not be used because red figures cannot be distinguished from black when photocopies are made. Decreases in taxable measure should be preceded by a minus sign (—) on all summary schedules.

SCHEDULE HEADINGS**0302.25**

The name of the taxpayer should not appear on either subsidiary or summary schedules unless necessary for the identification of a non-permitized retailer. The title will be inserted on the second line of each schedule describing the type and source of information contained therein, such as Total Sales per General Ledger, Test of Sales for Resales, etc.

If the schedule refers to some definite period such as month, quarter, or year, this period will appear under the title of the schedule (third line) as shown in the following example:

Test of Sales for Resale per Invoices
July, 19XX

All schedules will have a schedule number, page number, account number, auditor name, and date in the upper right hand corner.

COLUMN HEADINGS**0302.30**

Space provided for column headings is small so headings must be short but descriptive. If it is not possible to write a sufficient description in the column space provided, an asterisk or other mark should be placed at the end of the description. A referring asterisk mark should be at the bottom of the schedule with a complete description given. Unless handwriting is small and legible, column headings will be printed. The reference line should indicate the source of data in that column, using <angle brackets> for data from other schedules e.g., <12A-1> and (parentheses) for arithmetic computations e.g., (A + B - C).

TOTALS**0302.35**

Where a schedule lists two or more columns or classifications, vertical footings and cross-footings (horizontal) will be made and the grand totals balanced with each, as illustrated in the following example:

Analysis of Sales					
REF	<Per Sales Journal>				
					(A+B+C)
	Period	Taxable	Resale	Freight	Total
1	January, 19XX	\$ 500	\$ 400	\$ 100	\$ 1,000
2	February, 19XX	600	500	200	1,300
3	March, 19XX	700	500	300	1,500
4	1Q-9X Total	\$ 1,800	\$ 1,400	\$ 600	\$ 3,800

<414-A-1>

Footings and cross-footings should not be made unless they are clearly of value in the audit. The total may be shown either on the right or left side, depending upon use to be made of the data and convenience in compiling. Hand written schedules using a single space form (every line filled) will skip a line before inserting the total. Hand written schedules using double spacing (every other line filled) will not skip a line before inserting a total. All schedules (hand written and computer generated) will underline the last line of data with a single black line, and the total will be underlined with a double black line. *When a schedule is hand written and composed of two or more sheets which requires a grand total, a page total will be placed at the bottom of each sheet. A summary of page totals, computing the grand total, will be prepared in one of the following ways:*

- If the hand written schedule consists of a few pages and sufficient space is available on the last sheet, page totals for the preceding pages may be entered under the page total for the last sheet, and a grand total computed.
- If the hand written schedule consists of a large number of pages, a separate sheet showing the summary of page totals should be prepared. This summary sheet should then appear as the first page of the schedule, followed by the pages containing supporting details.
- Computer generated schedules with multiple pages may place page totals on a separate page via a pivot table.

To maintain the integrity of the database, the data will be scheduled without skipping a line for computer generated schedules.

SUBTOTALS**0302.40**

Hand written subsidiary schedules often are set up by months with subtotals every three months showing quarterly totals. To improve the appearance and legibility of subsidiary schedules, the first month of the first quarter should be entered on the second line below the space for column headings with quarterly totals shown on the first heavy line; the first month of the second quarter should be shown on the second line after the first heavy line, and so on. In this manner, quarterly totals will always be shown on the heavy lines.

Subtotals for other types of data should be set off by single lines whenever possible.

LAYOUT**0302.45**

The auditor should set up the most efficient mechanical arrangement possible before the compilation of data is started. This avoids transcribing figures from taxpayer books before the correct arrangement of a schedule has been decided upon, with the result that the worksheet must be discarded when its defects have been disclosed. Time may be saved by setting up several proposed layouts with column headings on scratch paper, columns being numbered from 1 to 7, or from 1 to 15, and inserting some sample entries before deciding on a final layout.

If dates, or months and quarters, are to be shown in a left-hand column, sufficient columns should be provided for horizontal expansion; that is, there should be a column for each type of classification with blank columns for possible additional classifications not yet disclosed. When there are insufficient columns for the proper horizontal spread, the months should be placed across the top and the classifications shown on lines, with blank lines left in the proper places for vertical expansion. In many cases when the columns on one sheet are not sufficient, the schedule must be broken into two sheets. If there is sufficient space on a schedule, lines should be skipped between subsections and totals. This sets the information out and makes it easier to read. Where there are only a few entries on the sheet, every other line should be used for recording data. Again, to maintain the integrity of the database and to facilitate the use of a pivot table, no lines should be skipped when using a computer generated schedule. The spreadsheet can always be expanded to include additional columns and/or rows.

INDEXING — GENERAL**0302.50**

A standard system of indexing working papers is desirable. Although there are many indexing plans, a system based on line numbers shown on tax returns has been adopted for indexing schedules of business tax audits.

INDEXING SUMMARY SCHEDULES**0302.55**

Summary schedules will bear the line numbers appearing opposite the corresponding items on tax returns. The following summary schedule indexing systems will be used for sales and use audits:

Total Sales Basis Only (Exhibits 7 to 36):

Schedule 1.	Total Sales
Schedule 4.	Sales for resale
Schedule 5.	Food Products
Schedule 6.	Nontaxable Labor
Schedule 7.	Sales to U.S. Government
Schedule 8.	Interstate Sales, Etc.
Schedule 9.	Sales Tax Included
Schedule 10.	Other Exempt Transactions

Taxable Measure Basis Only (Exhibits 37 to 65):

Schedule 12.	Taxable Measure
--------------	-----------------

Either Total Sales or Taxable Measure Basis:

Schedule 2	Purchases Subject to Use — Tax
Schedule 15.	Purchases Subject to Local Tax
Schedule 16.	Taxable Measure – Local Tax
Schedule 20	Section 6406 Credits
Schedule A8.	Taxable Measure – District Tax — (Name of District)
Schedule A8.1 to A8.x	To be used when adjustments are made to more than one district tax)
Schedule G2	Sales Tax Paid to Distributors and Brokers (Gasoline Sellers)

Schedules for audits made on a taxable measure basis will be numbered as Schedule 12, which corresponds with the line number reporting the measure of tax on a return. However, self-consumed items and purchases subject to use tax should be identified separately in the analysis of differences on audit schedules and audit reports. This provides a clearer analysis of the proposed measure of tax on Form BOE-414-A. As an alternative, self-consumed items and purchases subject to use tax may be included on Schedule 2, and taxable sales differences on Schedule 12. Schedules in interdistrict cooperative audits will precede the schedule number with the identifying letters (e.g. AB, CH, FH) of the district preparing the schedule.

Schedule 16 will be prepared only when the state and local tax adjustments to reported amounts are different. Since such differences will occur infrequently, it is anticipated that most audits will not require a Schedule 16.

Schedule A8 will be prepared only when the state and district tax adjustments to reported amounts are different. When adjustments to reported amounts are different for state and district taxes, a separate district tax summary schedule must be prepared for each district where audited differences are noted.

If only one district tax summary schedule is required, the schedule should be indexed as A8. If more than one district tax summary schedule is required, the schedules will be indexed as A8.1, A8.2, A8.3, etc., to include all district taxes for which summary schedules are required. The indexing system does not identify a particular A8 summary schedule to a district; therefore, the name of the district should be identified in the schedule heading.

All district tax summary schedules will be prepared on a taxable measure basis irrespective of whether the remainder of the audit was conducted on a total sales basis.

Both Schedule 16 and Schedule A8 summarize all of the differences to the measure of tax and are the sources for the measure of tax on Form BT-414-A1.

There shall be no deviation from this system of indexing.

INDEXING SUBSIDIARY SCHEDULES

Subsidiary schedules which directly support summary schedules will bear the same capital letter followed by a dash and numeral, i.e. 12A-1, 12A-2, 12B-1, 12C-1, 12D-1, etc. Subsidiary schedules supporting other subsidiary schedules will bear the same capital letters followed by a dash and the same numerals followed by adding small letters, i.e., 12A-1a, 12A-1b, 12A-2a, 12B-1a. An example of the complete indexing system is as follows:

Schedule 12	(Lead Schedule, Taxable Measure Understated/Overstated)
Schedule 12A	(Summary Schedule of First Tax Difference)
Schedule 12A-1	(Subsidiary Schedule for First Tax Difference)
Schedule 12A-1a	(Subsidiary for Subsidiary Schedule for First Tax Difference)
Schedule 12B	(Summary Schedule of Second Tax Difference)

Thus, the schedules should be laid out as indicated by the following chart:

Layout and Assembly of Schedules

It is not good practice to subdivide subsidiary schedules too finely. Often page numbers may be used to designate subdivisions; for example, if a number of pages are used to accumulate data which are summarized on the first sheet, the whole series should be assigned the same index number with pages numbered from 1 up, as follows:

Schedule 12A Page 1 of 3 June 19X1	(Questioned Sales for Resale)
Schedule 12A Page 2 of 3 Oct. 19X2	(Questioned Sales for Resale)
Schedule 12A Page 3 of 3 Page Total Summary	(Questioned Sales for Resale)

When indexed in this manner, the schedule should be cross-referenced as 12A-pg. 1, not 12A-1, which refers to a subsidiary schedule supporting Schedule 12A.

If there is only one page to a subsidiary schedule, the "Page" does not require numbering, but if more than one exists, the pages should be numbered from 1 up, as follows: 1 of 6, 2 of 6, 3 of 6, etc.

Subsidiary schedules to audits made on the total sales basis will be indexed as follows:

Schedule 1	(Summary or Total Sales)
Schedule 1A	(Subsidiary)
Schedule 1A-1	(Subsidiary)
Schedule 1A-1a	(Subsidiary)

INDEXING MEMO AND SUPERSEDED SCHEDULES**0302.65**

Memo schedules will be marked "Memo" above the caption "Page," and should be numbered from 1 up, in the space opposite the caption "Schedule." Superseded schedules will be marked "Superseded" diagonally across the body of the sheet. (Section 0302.80)

CROSS-REFERENCING**0302.70**

Cross-referencing is necessary to facilitate tracing figures back to the underlying schedules and to aid in tracing subsidiary schedules forward to the summaries. It greatly assists the reviewing auditors and hearing officers and should be used in small audits as well.

Examples of the method by which cross and source references are to be made are shown on the schedules in the various exhibits.

INDEX TO WORKING PAPERS**0302.75**

An audit report will contain an index that is prepared on Form BOE-495, Index to Working Papers, whenever five or more lead and subsidiary schedules are prepared for an audit. See Exhibits 8 and 37.

A very large set of audit working papers is sometimes bound together in sections with an index of schedules prepared for each section, and is often marked with tabs for each main section.

Note: In the Index to Working Papers, dashes rather than page numbers are shown in the Page Number column for schedules that contain only one page. For schedules consisting of more than one page, the number of pages are shown in the Page Number columns as 1-2, 1-4, 1-10, etc.

ARRANGEMENT**0302.80**

All schedules and exhibits will follow the pertinent schedules to which they relate. Other papers, such as letters, superseded schedules and exhibits of general nature, will be identified as memo schedules, and placed at the back of the audit. Audit working papers should not reference memo schedules. A schedule important enough to be referred to in the audit working papers should be included as a regular schedule directly behind the schedule to which it relates (e.g., XYZ letters, resale certificates, etc.).

The entire file will be carefully lined up on the top and left edges. These sheets should be bound together. A hole to receive the paper fastener, approximately 3/16" in diameter, will be punched in the upper left-hand corner of all papers in such a position that all writing will remain clearly visible.

CONTENT OF WORKING PAPERS**0303.00****BASIC DATA****0303.05**

The basic data to be shown on subsidiary schedules should be carefully considered. Figures and other data should not be copied from the taxpayers records without thought given to their significance or ultimate use. On the other hand, all data which could be used in the section under consideration, as well as in other sections of the audit, should be recorded while the documents are being examined so that there will be no necessity for pulling them again; i.e., names, dates, invoice numbers, descriptions of items, points of origin, shipping data, district, and accounts charged should be recorded if any possible use is foreseen. In many cases, certain reference data are required by the taxpayer in examining the schedules for correctness, and if such information is not on the schedule, much time is lost while the taxpayer secures the desired documents and makes the examination.

SUMMARY OR LEAD SCHEDULES**0303.10**

Summary (also called lead) schedules represent the final recapitulation of audited and reported figures, differences and analysis of differences, and are prepared for each main section of the audit where there is a difference between the audited and reported figures. They are the basis for transcribing net differences per audit to "Summary of Differences" on Schedule 414-A2 or Schedule 12.

SUBSIDIARY SCHEDULES**0303.15**

Subsidiary schedules support summary or other subsidiary schedules. The information shown on this schedule is an analysis of the data shown in total, or by quarters, on the summaries and usually consists of compilations by months to compute quarterly totals, compilations by days, items, or other classifications to determine monthly totals, or data to support calculations of percentages. Adding machine tapes may be included in audit work papers in lieu of listing the figures on a schedule *as long as the auditor provides an audit trail to the taxpayer's documents. Tapes should be attached to a seven-column work paper and be displayed so totals are visible.* The basis for computing audited figures are recorded on these schedules, e.g., monthly totals from the sales account, individual sales from the cash receipts book, list of individual sales from sales invoices used for test checks, lists of individual purchases from purchase invoices used for computing use tax liability. In a sense, subsidiary schedules are the most important worksheets of the audit since all essential detailed information is compiled thereon. The data should be so complete that an auditor who did not assist in compiling it could, nevertheless, interpret the results, make the required calculations, or prepare summary schedules.

MEMO SCHEDULES**0303.20**

Some examples of memo schedules are as follows:

1. Audit program.
2. Miscellaneous data including:
 - (a) Copy of BOE-1164's and BOE-1032's prepared (required)
 - (b) Copy of letters to and from taxpayers.

In many cases, the information contained in these schedules has an important bearing on the audit, and they should be carefully preserved.

Memo schedules, however, do not include schedules or materials that have a direct bearing on other audit schedules or findings (i.e. XYZ letters, taxpayer prepared schedules, etc.). Such schedules should be included as part of the audit working papers and indexed as schedules accordingly (e.g., 12A-1, 12B-1a, etc.).

MEMO OF TIME OF AUDITORS**0303.25**

When more than one auditor is engaged on an audit, which requires considerable time to complete, the auditor in charge may prepare a memo schedule to which they should post daily time. The names of the auditors should be shown in the column headings, and dates in the extreme left-hand column. This record must agree with the time reported on Form BOE-609-A, Auditors Time Report, Form BOE-610, Auditors Monthly Report, Form BOE-666, Employees Summary Time Report, and on the reverse side of Form BOE-414-A, Report of Field Audit.

MEMO OF WORK TO BE DONE WHEN THE AUDIT IS DEFERRED**0303.30**

It is sometimes necessary to defer a partially completed audit to allow the taxpayer time to secure additional information. *In such cases, a memo should be prepared in duplicate outlining the work to be done by the taxpayer, and the approximate date of the auditor's return to the job.* The taxpayer should be given the original copy of this memo. Notes regarding the work completed and the work remaining to be done can be placed on the duplicate copy of the memo which will be placed on the top of the file of working papers for future reference when the auditor returns to the job. *Whenever completion of an audit is deferred to accommodate a taxpayer, the auditor may need to secure a Form BOE-122, Waiver of Limitation, unless it is certain that failure to do so will not in any way jeopardize the interests of the State.* (See Section 0215.15 for guidance on when to request a waiver.)

VERIFICATION COMMENTS**0304.00****COMMENTS ON SUMMARY SCHEDULES****0304.05**

General verification comments are to be written on summary schedules. Specific comments on detailed verification should be made on subsidiary schedules. (See Section 0304.30.) The comments should be clear, specific, and concise. They should be written in an orderly manner stating simply the nature of the transactions, the records examined, the taxpayer's method of reporting, the audit approach, and the result, or audit findings. An example of the captions that should be used in all audits is illustrated below in Sections 0304.10 to 0304.20.

TYPES OF TRANSACTIONS**0304.10**

Under this heading, the auditor very briefly gives a description of the taxpayer's business and the types of transactions encountered in the audit. Example: Assuming the audit is of a furniture manufacturer, the Total Sales Summary schedule comment might read:

"The taxpayer is a manufacturer, repairer, and reconditioner of furniture. Also, the taxpayer manufactures custom furniture made from resale inventory as well as customer supplied material."

SOURCE OF DATA**0304.15**

Under this heading, the auditor indicates the documents and records that were available for examination and the period for which the documents and records exist. In the case of the furniture manufacturer this comment might read:

"Source data consisted of customer purchase orders, sales invoices, sales journals, monthly profit and loss statements, and general ledger. All records were complete and available for the entire audit period. Franchise Tax Returns were available for calendar years 1998, 1999, and 2000."

This heading would need to be modified if the taxpayer did not provide any records during the audit period.

REPORTING METHOD**0304.17**

Under this heading, the auditor provides a brief description as to how the taxpayer reports his/her sales as well as purchases subject to use tax on the sales tax return. The comment should indicate whether the taxpayer nets any sales and if sales tax is included in reported total sales (Line 1 of return). Assuming the same furniture manufacturer, this comment might read:

"The taxpayer reports total sales ex-tax on line one and claims sales for resale and repair labor on lines four and six respectively. Recorded sales tax is reconciled to sales tax paid and the reconciliation work sheet is attached to the tax return. The taxpayer did not report any purchases subject to use tax."

This heading may be omitted if the taxpayer did not report to the Board since this would be obvious from other information.

VERIFICATION AND FINDINGS**0304.20**

Under this heading, the auditor briefly summarizes the verification performed and explains what was found and why it is considered to be either taxable or not taxable. The subheadings under this section should be relevant to the items examined and noted in the audit (Tax Accrual Reconciliation, Total Sales, Purchases Subject to Use Tax, etc.) The auditor will need to modify the subheadings in this section to areas examined in their audit.

Comments should be meaningful and necessary. For example, the statement “Findings” — None is unnecessary and should be avoided. If it is obvious from the schedule that there are no differences, this heading should be omitted.

Under the Total Sales summary of the furniture manufacturing company, this comment might read:

“Sales invoices were traced to the sales journal for the period January 1997, and August 1998, and the sales journal footings were traced to general ledger for the audit period. Reported total sales were reconciled to total sales per the general ledger and Franchise Tax Returns for years 1998, 1999, and 2000. No errors or differences were noted. Total reported sales were accepted by the auditor.”

Under the Sales for Resale summary schedule, the following Verification and Findings comment might read:

“Recorded sales for resale per the sales journal were reconciled to claimed resales for the audit period. No differences were noted. Recorded sales for resale for December 19XX were tested. December 19XX was selected based on a conversation with the taxpayer who indicated this period accurately represented sales for resale for the audit period. All sales for resale invoices for December 19XX were examined and traced to available resale certificates. The resale certificates were verified as taken in good faith, bearing valid sellers’ permit numbers, and signed by purchasers in the business of selling furniture. 20% of December 19XX recorded sales for resale were not supported by resale certificates or valid XYZ responses. The 20% rate of error was applied to claimed resales for the audit period. See Sch. <12J-1> for additional information.”

COMMENTS ON SUBSIDIARY SCHEDULES**0304.30**

Subsidiary schedules should have brief comments written near the bottom, unless the information is self-evident from columnar headings or is covered in the remarks columns or by other notations. *Subsidiary schedule comments should not be the same as comments on the summary schedules.* It is important for the auditor to remember that over-all verification comments are for the summary schedules and specific verification comments are for the subsidiary schedules. *The information contained on these subsidiary schedules should show:*

- Source of data and a brief description of nature of same.
- Extent of verification.
- Basis of estimating where estimates are used.
- Method of calculating percentages.
- Explanation of differences between reported and audited figures if not shown on Remarks column.
- Any other comments pertinent to the method of reasoning used to determine the facts and figures shown on the schedule.

MISCELLANEOUS COMMENTS AND NOTES**0305.00****NO RECORD CASES****0305.05**

In cases where records are incomplete or non-existent, it will be necessary to estimate the tax liability based upon the most reliable information the auditor can obtain. *In these instances, the comments should be very complete and should indicate clearly the method used in estimating the tax liability, why a particular method was used in preference to some other, and any additional factors tending to confirm the correctness of the auditor's estimate of the tax liability.*

FLUCTUATION IN SALES OR DEDUCTIONS**0305.10**

Verification comments **should always** include an explanation of abrupt fluctuations in sales, markups, or in any of the deductions claimed by a taxpayer.

PURCHASES SUBJECT TO USE TAX**0305.15**

Comments under this caption should indicate whether purchases subject to use tax were properly reported.

Comments should always show the general location of the supplier's business. The comments should be particularly clear and complete in those instances where the purchases subject to use tax were made from a California retailer. Any major purchases reported should be fully described on the subsidiary schedule where such purchases are listed. (Section 0401.20 and 0408.22).

PURCHASES SUBJECT TO SECTION 6406 CREDIT**0305.17**

Section 0208.15 defined Section 6406 Credit and noted how headquarters records this credit on Form BOE-414. (Section 0419.20 for further information.)

Comments under this caption should indicate if the credit was properly claimed. Differences noted in the audit should be explained.

SALES TAX INCLUDED IN GROSS SALES**0305.20**

Whether a retailer may add sales tax reimbursement to the sales price of the tangible personal property sold at retail to a purchaser depends solely upon the terms of the agreement of sale. Certain presumptions concerning the addition or inclusion of sales tax reimbursement are created by Civil Code Section 1656.1. See Regulation 1700(a)(1)&(2).

PREPAYMENT OF SALES TAX ON MOTOR VEHICLE FUEL (MVF)**0305.22**

A portion of the sales tax, which is ultimately due on the retail sale of MVF, is prepaid at the time of the first taxable distribution of MVF in this state. These prepayments into the "SG" fund are separate from the sales and use tax program and must be verified as part of routine audits of MVF sellers.

OVERPAYMENTS**0305.25**

For reasons indicated in Chapter 2, verification comments should be particularly complete in audits recommending refunds. (See Section 0216.03.)

TAX ERRORS ON RETURNS**0305.30**

Any material unexplained differences between the total tax on Form BOE-414 and the tax paid by the taxpayer should be commented upon fully by the auditor under the appropriate caption on the back of Form BOE-414-A. Comments should indicate why the differences cannot be explained and their probable nature.

NOTES**0305.35**

Notes, as distinguished from the verification comments, should give the detail of all significant differences affecting taxable sales as well as the reason for the differences. If, for example, certain sales for resales were disallowed, the note on this subject should not only indicate that fact, but also the reason for disallowance. Wherever possible, these notes should appear on the same line on the schedule as the item, which is being explained.

SPECIAL EXPLANATION**0305.40**

It may be necessary to make comments or explanations on the summary or subsidiary schedules, which are of a kind other than those previously indicated. This type of comment should be made under a heading, which describes the subject matter as precisely as possible.

For example, rental transactions may affect several items on the tax return such as total sales, purchases subject to use tax, or some other deduction. In commenting on rentals, it will often be simpler to discuss all phases of the transactions under the single heading "Rentals" rather than to discuss it in part under a number of separate headings.

DATING ENTRIES IN AUDIT REPORTS AND WORKING PAPERS**0305.50**

A uniform method of dating entries is to be used in both computer generated and hand written audit reports and working papers. Dating entries are as follows:

- (a) Specific dates are to be entered as: 1/1/1999, 2/19/1999, etc.*
- (b) Specific months are to be entered as: May 1999, July 1999, etc.*
- (c) Specific quarters are to be entered as: 1Q-99, 2Q-99, etc.*
- (d) Specific years are to be entered as: YR98, YR99, etc.*
- (e) Specific fiscal years are to be entered as: FY97/98, FY98/99, etc.*

SAMPLE WORKING PAPERS**0305.60**

Computer generated working papers are a part of this chapter. Features, which should be noted, are indexing and cross-referencing, cross-footings, format, and comments on the schedules. They should be carefully studied as an illustration of the type of working papers desired to support tax audits.

It is impractical to illustrate all of the numerous variations of working papers that may be used to record and summarize data secured during the course of an audit. The illustrations in this chapter are samples only. The schedules illustrating total sales and sales for resale may be used for any deduction where the arrangement fits in with the audit program. There are two general types of working papers illustrated, summary schedules and subsidiary schedules. Summary schedules (0303.10) always present certain basic information, usually by quarters; i.e., period, amount per audit, amount reported, difference, and analysis of difference. Subsidiary schedules (0303.15) are arranged to present the desired information in a form to fit into the summary schedule which they support.

Note: 1																															
Auditors can justify columns to make worksheet readable.																															
Note: 2																															
Schedules should be printed on legal size (8.5 x 14) to conform to 0302.08.																															
Note: 3																															
All exhibits in this chapter were prepared using the audit macro package in Excel. In order to efficiently utilize the district tax pivot table, district tax measure should be scheduled as shown in the example above.

Note: 1

Auditors can justify columns to make worksheet more presentable and do not have to conform with template default.

Note: 2

Schedules should be printed on legal size (8.5 x 14) or larger to conform to 0302.08.

Note: 3

All exhibits in this chapter were prepared using the audit macro package in Excel. In order to efficiently utilize the district tax pivot table, district tax measure should be scheduled as shown in the example above

VERIFICATION COMMENTS

TYPES OF TRANSACTIONS

The taxpayer is a retailer of electrical supplies with a machine shop for making customized parts for special orders. Some repair work is done. The taxpayer has two locations: Los Angeles and San Francisco. Sales are recorded and reported on the accrual basis and sales tax reimbursement is added to the selling price of materials sold.

SOURCE OF DATA, AUDIT PERIOD

General ledger, sales journal, cash receipts journal, general journal, sales tax returns, and other related documentation.

VERIFICATION AND FINDINGS

Sales are initially recorded by the taxpayer at the time of sale on numerically sequenced invoices. The invoices were hand posted to a manually prepared sales journal through December 1998. Beginning January 1999, the taxpayer posted sales invoices to a computer generated sales journal. Both the hand and computer generated sales journals segregated sales by type of sale; Taxable, resale, repair, labor, U.S. Government, and interstate commerce. Separate sales journals are prepared for each location and are combined when posted to the general ledger.

Note:

The * referenced above refers to the upload schedule and is to be broken out by separate non-compliance codes.

25		Comments						
26		Discussion with sales manager indicated that sales for resale, U.S. Gov't, and						
27		Interstate sales were made at consierably less mark-up than taxable sales. He						
28		estimated that the average mark-up on these sales was 10%. A test of a few						
29		invoices substantiated the estimate. Cost of these sales has been eliminated at						
30		the 10% mark-up so that a computation could be made of the mark-up on taxable						
31		sales as above.

Comments

In January 1999 the taxpayer changed over from a hand posted to an automated accounting system. Obvious posting and recording errors were made during the changeover. Journal entries were prepared to adjust for the errors, however, an invoice which had not been recorded was over looked. In view of the nature of the error and the quality of internal control present, the error was considered non-recurring.

COMMENTS

The company has a policy of selling goods to employees out of resale inventory. Resale cards were issued for merchandise sold to employees. There was no misuse of resale certificates since the goods were intended to be resold when purchased. All employee sales are made for cash and are segregated between both of the locations in the cash receipts journal. The auditor advised the taxpayer that employee sales should be self-reported on future returns.

VERIFICATION COMMENTSTypes of Transactions

The taxpayer purchases some supplies from unregistered out-of-state vendors and also makes regular withdrawals for own use from ex-tax inventory.

Source of Data

Paid bills, general ledger, and general journal for the audit period.

Verification

The taxpayer maintains all vendor invoices in an alphabetical file by vendor.

Examined the purchases file on an actual basis since it contained all invoices for the audit period. Ex-tax purchases of expense items were scheduled on <2B>. Reported amounts on line 2 were purchases from a single, unregistered, out-of-state vendor.

The general ledger capital assets and expense accounts were reviewed for possible purchases subject to use tax. Withdrawals from ex-tax inventory for the taxpayer's own use were scheduled on <2A>. No additional purchases subject to use tax noted.

Findings

- A) Withdrawals from ex-tax inventory for own use not reported.
- B) Supply purchases from out-of-state vendors subject to use tax not reported.

Note:

The * referenced above refers to the upload schedule and is to be broken out by separate non-compliance codes.

VERIFICATION COMMENTSTypes of Transactions

Sales for resale are mainly to electrical supply and hardware retailers.

Source of Data

Sales journal, sales invoices, customer P.O.'s, resale card file, and other related documentation for the audit period.

Verification and Findings

A stat sample was made of sales for resale. The sample size was calculated based on the results of the block sample used in the prior audit <4B-1>. The sample was selected using the Board's P.C. random sample program.

Sample invoices, amounts and questioned transactions are scheduled on <4A-1 page 1>. Resales were traced to resale cards maintained by the taxpayer. The taxpayer was able to establish that most of the questioned transactions were valid sales for resale. A percentage of disallowance (5.85%) was calculated on <4A>.

A portion of the disallowed resales were the result of a transposition error by the taxpayer when preparing the 4Q-98 return.

Note: 1

Schedule 4B-1, "Calculation of Sample Size", is not shown in this sample audit. For an example of the sample size calculation, see Chapter 13, Exhibit 13.

Note: 2

The * referenced above refers to the upload schedule 12 and is to be broken out by separate non-compliance codes.

VERIFICATION COMMENTS

TYPE OF TRANSACTION

Labor sales were relatively few in number. Most labor sales involve repairs, yet, a few fabrication labor sales were disclosed. For repairs, customers send the items to either one of the taxpayer's locations and then the repaired items are shipped by the taxpayer back to the customer.

SOURCE OF DATA

Sales Journal and sales invoices for the audit period and other related documentation.

VERIFICATION

Labor sales were examined on an actual basis for the audit period since there were a relatively small number of labor sales. Purchase orders, sales invoices, and job sheets were examined to determine the taxable and non-taxable elements of each job. Disallowed labor sales were scheduled on <6A>.

FINDINGS

- Fabrication labor claimed as exempt repair labor.
- Repair materials erroneously recorded as repair labor.

Note:

The * referenced above refers to the upload schedule 12 and is to be broken out by separate non-compliance codes.

All exhibits in this chapter were prepared using the audit macro package in Excel. In order to efficiently utilize the district tax pivot table, district tax measure should be scheduled as shown in the example above.

VERIFICATION COMMENTS**TYPES OF TRANSACTIONS**

The taxpayer makes a relatively small number of sales to customers located out of state.
All goods shipped out of state are shipped via common carrier.

SOURCE OF DATA

Sales journal, sales invoices, and bills of lading for the audit period. U. S. Customs export declarations. Other related documentation.

VERIFICATION

Interstate commerce sales were examined on an actual basis for the audit period since the total number of transactions was small in number. Claimed interstate sales were traced to shipping documents. Disallowed interstate commerce sales were scheduled on <8A>.

FINDINGS

A) Merchandise was shipped via common carrier to a warehouse in San Diego as a collection point for other goods before being shipped out of the country.

Instructional Note:

Amounts shown in column "C" were transcribed from the detailed supporting schedule 8A (not shown).

Note:

The * referenced above refers to the upload schedule 12 and is to be broken out by separate non-compliance codes.

5						*		<414-A2>	

VERIFICATION COMMENTS**TYPES OF TRANSACTIONS**

Taxpayer writes off bad debts on an actual basis. Amounts written off are claimed on the federal income tax returns.

SOURCE OF DATA

Accounts receivable ledger, sales invoices, and sales tax return worksheets.

VERIFICATION AND FINDINGS

Accounts receivable of \$8,406 from ABC Corp., bankrupt, were written off to the allowance for bad debts account on 1-1-99. The claimed amount was traced to the sales tax return worksheet and to the original sales invoices. Exempt labor sales, etc., were erroneously included in the amount claimed. ABC Corp. was located in Newport Beach and merchandise was shipped to ABC's location. When claiming the bad debt deduction the taxpayer adjusted transit tax measure on line A5 of the return; ABC's sales were subject to the OCTA transit tax.

Instructional Note:

Amounts shown in column "C" were transcribed from the detailed supporting schedule 10A (not shown). Describe disallowed bad debts on BT-414-A as "Excess of Bad Debts Deduction Over Taxable Sales - Quarter Ended 3-31-99".

Note:

The * referenced above refers to the upload schedule 12 and is to be broken out by separate non-compliance codes.

VERIFICATION COMMENTSTYPES OF TRANSACTIONS

Taxpayer makes sales of electrical components for aircraft and general operational use.

All sales were made in Los Angeles.

SOURCE OF DATA

Sales journal, exemption certificates, sales invoices, and purchase orders.

FINDINGS

Claimed sales to aircraft common carriers were examined on an actual basis for the audit period because the total number of transactions were minimal. Exemption certificates were reviewed to verify the claimed deductions. Auditor noted several claimed exemptions that were not supported by an exemption certificate. Further review of the records and discussion with the taxpayer disclosed that these sales were to firms that were not aircraft common carriers <16A>. In addition, the examination disclosed sales to aircraft common carriers that were not used or consumed directly and exclusively in the carriage of persons or property <16A>.

* Recorded as a memo listing in the sales journal.

Instructional Note:

Amounts shown in column "C" were transcribed from the detailed supporting schedule 16A (not shown).

Note:

The ** referenced above refers to the upload schedule 12 and is to be broken out by separate non-compliance codes.

<414-A1>

VERIFICATION COMMENTSTYPE OF TRANSACTIONS

The taxpayer has two business locations: Los Angeles and San Francisco. Sales are made in both transit districts and outside of the districts. The taxpayer is not engaged in business in any other transit districts.

VERIFICATION AND FINDINGS

The auditor noted any transactions subject to transit tax in the state tax workpapers. For detail of verification performed, see the referenced state tax schedules.

Disallowed resales subject to BART tax were calculated based on the ratio of disallowed resales subject to transit tax to total resales tested. There were no unusual BART transactions noted in the resale examination. The periods tested were representative of the audit period with regard to the type, number and size of transit district transactions tested.

(1) Recorded as a memo listing in the sales journal.

2 VERIFICATION COMMENTS

3

4 TYPES OF TRANSACTIONS

5 The taxpayer is a retailer of electrical supplies with two locations: San Francisco and Los Angeles.

6 Most sales are taxable sales to construction contractors. Other sales consist of resales to hardware

7 retailers, interstate commerce sales to out-of-state retailers, sales to the U.S. Government, and a small

8 number of sales to employees.

9

10 Sales are recorded and reported on the accrual basis. Sales tax reimbursement is added to the

11 selling price of materials sold. In January 1999, the taxpayer changed over from a manual to an

12 automated accounting system.

13

14 SOURCE OF DATA

15 General ledger, general journal, supporting journals, sales tax returns, paid bills, sales invoices,

16 and customer P.O.'s for the audit period. Resale cards, shipping documents, and other related

17 documentation also were available.

18

19 VERIFICATION AND FINDINGS

20 This examination was done on a taxable measure basis. Sales are initially recorded by the

21 taxpayer at the time of sale on numerically sequenced invoices. The invoices were hand posted to a

22 manually prepared sales journal through December 1998. Beginning January 1999 the taxpayer posted

23 sales invoices to a computer generated sales journal. Both the hand and computer generated sales

24 journals segregated sales by the type of sale; taxable, resale, repair sales, U.S. Government, and

25 interstate commerce. Separate sales journals are prepared for each location and are combined when

26 posted to the general ledger.

VERIFICATION COMMENTS - continued

Recorded sales were transcribed from the sales journal on <12A>. Sales invoices were traced into the sales journal for two complete recording cycles; July 1998 and January 1999. One unrecorded sale was noted during the changeover to the automated accounting system. See <12D> for detail of differences and additional comments. No recurring errors were indicated; so no further examination was done.

Sales journal totals were traced to the general ledger for the audit period. No errors were noted.

Recorded amounts agreed with the reported/claimed amounts except for one transposition error in claimed resales on the 4Q-98 return. See <12I> for detail of differences and additional comments.

A reconciliation of sales tax accrued and reported disclosed no differences.

Total sales were reconciled with the federal income tax returns filed during the audit period on <12C>. No material differences were disclosed and no unreported sales were indicated.

A mark-up analysis on taxable sales was done on <12B>. No unreported taxable sales were indicated.

The taxpayer failed to report sales of resale inventory to employees. These sales were transcribed from the cash receipts journal for the audit period. See <12E> for detail of differences and additional comments.

The auditor examined the fixed asset accounts for the audit period. One unreported sale of a forklift was disclosed. See <12F> for detail of differences and additional comments.

2

VERIFICATION COMMENTS - continued

3

4

USE TAX

5

The auditor examined paid bills for the audit period and scheduled all ex-tax supply purchases.

6

See <12H> for detail of differences and additional comments.

7

8

The taxpayer self-consumed some of the ex-tax inventory. Self consumed amounts were transcribed from the general ledger for the audit period. See <12G> for detail of differences and additional comments.

10

11

No ex-tax fixed asset purchases occurred during the audit period.

12

13

RESALES

14

The auditor used a statistical sample on sales for resale. Resales were traced to resale cards on file and questioned items were scheduled. See <12J> for detail of differences and additional comments.

16

Questioned items were further investigated by tracing them to purchase orders or by sending out XYZ letters. A percentage of disallowance for resales was calculated and applied to total recorded resales.

18

No additional errors in recorded resales were indicated.

19

20

LABOR

21

Labor sales were relatively few in number, so the auditor examined them on an actual basis.

22

Disallowed labor sales consisted of fabrication labor claimed as repair and total repair invoices including materials and tax reimbursement, claimed as repair labor. See <12K> for detail of differences and additional comments. No other errors in claimed labor sales were indicated.

25

26

INTERSTATE COMMERCE

27

Interstate commerce sales were few in number and were examined on an actual basis. Three foreign commerce sales made to the same customer were disallowed since they were delivered in California. See <12L> for detail of differences and additional comments.

3

4 BAD DEBTS

5

6 The taxpayer claimed one bad debt during the audit period. The auditor traced the amount claimed
 7 to the accounts receivable subsidiary journal and to the actual invoices written off. See <12M> for detail
 8 of differences and additional comments.

9

10 U. S. GOVERNMENT

11

12 The auditor examined sales to the U. S. Government on an actual basis for the audit period. No
 13 errors were disclosed.

COMMENTS

In January 1999 the taxpayer converted from manual to machine posting. Obvious posting and recording errors were made during the changeover. Journal entries were prepared to adjust for the errors; however, an invoice which had not been recorded was overlooked. In view of the nature of the error and the quality of internal control present, the error was considered to be non-recurring.

COMMENTS

The company has a policy of selling goods to employees out of resale inventory. Resale cards were issued for merchandise sold to employees, but, no misuse of resale certificate was indicated since the goods were intended to be resold when purchased. All employee sales are made for cash and are segregated between the two locations in the cash receipts journal.

Instructional Note:

In the event a taxpayer asserts that the use tax on a questioned purchase was remitted to the Board by the vendor either on his or her tax return or audit determination a ABC letter should be sent. To assist the taxpayer in satisfying their use tax obligation, the Board has developed the Form BOE-503 (hereafter called the "ABC" Letter) procedure.

Note: 2

Schedules should be printed on legal size (8.5 x 14) or to conform to 0302.08. All exhibits in this chapter were prepared using the audit macro package in Excel. In order to efficiently utilize the district tax pivot table, district tax measure should be scheduled as shown in the example above.

COMMENTS

A stat sample was made of sales for resale. The sample size was calculated based on the results of the block sample used in the prior audit <12J-2a> (not shown). The sample was selected using the Boards P.C. random sample program.

Sample invoices, amounts and questioned transactions are scheduled on <12J-1a>.

Resales were traced to resale cards maintained by the taxpayer. The taxpayer was able to establish that most of the questioned transactions were valid sales for resale. A percentage of disallowance (5.85%) was calculated on <12J-1>.

A portion of the disallowed resales were the result of a transposition error by the taxpayer when preparing the 4Q-98 return.

Comments

The taxpayer wrote-off all uncollectible receivables from ABC Corporation on 1/1/99. The entire receivables from ABC were erroneously claimed on the 1/99 return. Receivables from repair labor and sales tax reimbursement were disallowed since tax was never reported on these amounts.

Not engaged in business in Orange County.

VERIFICATION COMMENTS**VERIFICATION**

Claimed sales to aircraft common carriers were examined on an actual basis for the audit period. Verification was made from the sales invoices and purchase orders. All sales were made in Los Angeles.

FINDINGS

- A) Sales to aircraft common carriers but not used or consumed directly and exclusively in the carriage of persons or property.
- B) Sales to firms that are not aircraft common carriers.

* Recorded as a memo listing in the sales journal.

Instructional Note:

Amounts shown in column "C" were transcribed from the detailed supporting schedule 16A (not shown).
